NotchTub User Manual

Version 1.2

Welcome to NotchTub

NotchTub transforms your MacBook's notch into a powerful command surface for media, system monitoring, and productivity tools. Built with native SwiftUI, it integrates seamlessly with macOS while staying out of your way until needed.

Designed with AntiGravity by VibeCoding

Installation

1. **Drag to Applications**: Move `NotchTub.app` to your `/Applications` folder.
2. **Launch**: Open NotchTub from your Applications folder or Launchpad.
3. **Permissions**:
    *   **Accessibility**: Required to interact with the system UI and detect the notch area.
    *   **Screen Recording**: *Optional*, but recommended for "expanded drag detection" and cleaner visual integration.
    *   **Automation**: Required for controlling Music/Spotify.
